

# Vocal Educator Toolkit

## Information Pack

Would you like to take your role as a singing teacher and educator to the next level?

The Vocal Educator Toolkit (VET) is a 5-week, online interactive small-group webinar that will aid you in becoming a more knowledgeable, empowered and effective vocal communicator, whilst also providing you with a community of likeminded vocal educators.

The VET is grounded in 3 foundational principles that will determine the effectiveness of your teaching at any level:

1. Your **knowledge**
2. The **application** of your knowledge into your own practice and
3. Your ability to **explain** your knowledge and how to apply it to others

The VET aims to empower you, the educator, by increasing your knowledge on the inner workings of yours and your students' voices. You will learn how to:

- Troubleshoot the vocal difficulties of your student using a simple 3-step method
- Select, demonstrate and teach relevant, evidence-based vocal exercises to promote optimal vocal functioning
- Expand your vocal terminology
- Become a more effective vocal communicator

If becoming a more knowledgeable, empowered and effective Vocal Educator is something that interests you, head to [www.vocalab.com.au](http://www.vocalab.com.au) to **register** for the Vocal Educator Toolkit in 2021.

Price & inclusions listed below
